The 16 Personalities test is incredibly spot-on and always gives me fresh insight. It's a great tool for self-reflection, and the detailed report is well worth the small cost. If you're looking to better understand yourself and grow, this is a must try!

I've been using 16Personalities for years bought the premium suite ages ago and I keep coming back every other year to retest. As consistent as my result, which is weirdly validating :) Logician (INTP-T). The insights are practical, if applicable. Highly recommend!

I read these premium materials during my vacation to California. I'm so glad that I did. I resonated with so much as I read about my personality type. I've always felt misunderstood or unseen. This aided me in seeing myself, and it was invaluable.
